

Papa Amadou Fall

FULL STACK ENGINEER | REACT, TYPESCRIPT, PYTHON/DJANGO, MYSQL AND AWS

Campbell River, British Columbia, Canada | fallpape199@gmail.com | github.com/omadigital23
linkedin.com/in/papa-amadou-fall-bb95a01a1 | omadigital23.github.io/PapaAmadouFall-FullStack/

PROFESSIONAL SUMMARY

Full Stack Engineer with project-based experience delivering customer-facing web applications from responsive React and TypeScript interfaces through REST APIs, database models and cloud deployment. Hands-on with Next.js, Python/Django, MySQL, PostgreSQL, Supabase and AWS. Brings structured production troubleshooting, bilingual communication and direct client collaboration to build reliable, maintainable software with clear ownership from requirement to release.

CORE TECHNICAL FIT

Frontend	React, TypeScript, Next.js, JavaScript, reusable components, state management, forms, accessibility, responsive UI, performance fundamentals
Backend	Python, Django, REST APIs, Next.js API routes, Node.js, authentication, authorization, business logic, server-side validation, integrations
Data	MySQL, PostgreSQL, Supabase, SQL, schema design, migrations, Row Level Security, query optimization fundamentals, data integrity
Cloud & delivery	AWS, Google Cloud, Linux, Nginx, DNS, HTTPS, Vercel, GitHub Pages, Git, GitHub Actions, CI/CD fundamentals
Quality & reliability	Strict TypeScript, ESLint, Vitest, Jest, Playwright, API testing, debugging, defect investigation, security validation, documentation
Automation & AI	n8n, webhooks, workflow automation, Groq-backed AI chat integration, RAG fundamentals, AI-assisted development workflows

SELECTED FULL STACK PROJECTS

NUBIA AURA - E-commerce checkout and order management

Full Stack Engineer | Next.js, React, TypeScript, Supabase/PostgreSQL | github.com/omadigital23/NUBIAAURA

- Built responsive cart, real-time calculations, multi-step checkout, order confirmation and customer order-history interfaces.
- Implemented API routes, authentication, stock reservations, database operations, payment integration and transactional notifications.
- Protected data integrity with trusted backend validation and coordinated inventory, checkout and customer feedback across system boundaries.
- Owned requirements analysis, architecture, schema design, implementation, testing, deployment, troubleshooting and maintenance.

OMA Digital - Bilingual production platform

Full Stack Developer / Automation Builder | Next.js, React, TypeScript, Supabase, Vitest, Playwright | github.com/omadigital23/OMADIGITAL

- Built reusable bilingual interfaces, lead-capture workflows, server API routes and a Groq-backed AI chat experience.
- Implemented validation, distributed rate limiting and secure public API boundaries for customer-facing features.
- Added SEO, PWA and offline capabilities and maintained automated unit and end-to-end test coverage.
- Deployed and maintained the production application while translating business needs into practical technical decisions.

PROFESSIONAL EXPERIENCE

OMA Digital - Full Stack Developer / Automation Builder

Freelance and project-based | 2015 - Present

- Deliver end-to-end applications and features across React/Next.js interfaces, Python/Django backend work, REST APIs and relational data models.
- Work directly with clients to clarify requirements, simplify workflows and turn business needs into maintainable product behaviour.
- Integrate authentication, databases, external APIs and automation workflows; use strict typing, linting, tests and documentation while deploying and troubleshooting across cloud environments.

XCM Sourcing - Videotron Project - Bilingual Technical Support Representative

December 2020 - June 2026

- Investigated and resolved production-facing connectivity, service and configuration issues through structured remote diagnosis.
- Documented and escalated complex defects while communicating clearly in French and English; developed accountable root-cause habits in a high-volume environment.

Additional Canadian employment: Tim Hortons - Customer Service Team Member | June 2026 - Present. Reliability, teamwork, procedure compliance and customer communication.

ADDITIONAL ENGINEERING EXPERIENCE

Python/Django: Build models, views, forms, authentication flows, migrations, REST endpoints and database-backed business rules with explicit server-side validation. Some client repositories are private.

AWS, Google Cloud and n8n: Provision cloud VMs; configure Linux, environment variables, DNS, Nginx and HTTPS; operate API/webhook workflows and troubleshoot application, network and deployment issues.

ENGINEERING APPROACH

Ownership Requirement through release and maintenance.	Quality Clear, typed, testable code and documented decisions.	Reliability Root-cause diagnosis and trusted data boundaries.
Customer focus Understandable flows and useful recovery states.	Simplicity Maintainable systems without unnecessary complexity.	Growth Production work, feedback and deliberate practice.

EDUCATION, LANGUAGES AND WORK AUTHORIZATION

Bachelor's Degree in Management Information Systems - University of Thies, Senegal

Relevant studies: information systems, Python, databases, software engineering, web development, business management and organizational computing.

French: TCF Canada - C1 listening, C1 reading, C1 writing, B2 speaking | **English:** Professional working proficiency | **Wolof:** Native

Currently in Canada with a valid employer-specific, LMIA-exempt work permit under the Francophone Mobility Program. A change of employer requires the applicable employer-side process and approval of a new work permit before employment can begin.
